

TELECOM RANGE
DEDICATED TO ISOLATED APPLICATIONS

KOHLER®
SDMO®

KOHLER-SDMO ENERGY, WHEREVER YOU NEED

KOHLER-SDMO is renowned as one of the top designers and manufacturers of generating sets worldwide. Thanks to the expertise of its engineering department and to tackle more specific demands, we are now capable to propose a range from **6 kVA to 44 kVA adapted to the Telecom market**, thanks to robust gensets with many benefits tailored to this market.

 Service interval
up to
1000 hours !*

 Large fuel tank
600L
1000L
2000L

 Power guaranteed
even in
extreme
conditions

 Enhanced
security
(IP64 locks,
built in fuel tank)

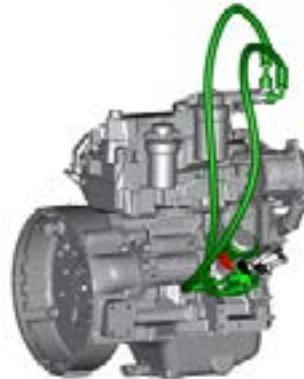

J22-LR**, specially designed for telecom applications

The J22-LR is fitted with a 3029DFS29LR engine, dedicated to telecom and remote applications, designed for KOHLER-SDMO.

This simple and robust generating set, regulated by mechanical injection, has an increased service interval, thanks to its extended oil and fuel filters, a large oil capacity and an oil cooler.

This configuration allows the operator to intervene on site not before 1000 hours.

3029DFS29LR engine

* Under the condition of use of appropriate oil and fuel type

** Long Running

As for all KOHLER-SDMO products, the J22LR has an optimized sound level, an excellent power handling even in extreme conditions, a high quality current in frequency and voltage regardless the load transition, management of all earthing systems, and is in appliance with the highest standards.

REMOTE MANAGEMENT/SUPERVISION for your installation

Remote management and supervision web interface is available for APM403 controllers, called WEBSUPERVISOR.

Available as an option, it allows from supervision of a single generating sets to management of a complete group. The parameters are sent to a server via 2G/4G/GSM communication.

This interface can be accessed from a PC, a tablet or a smartphone.
